01 | Problem Statement

No Convenient Flower Delivery

Customers must visit physical stores or call ahead. No seamless online flower ordering experience exists for regular buyers.

No Subscription Model

People who want regular fresh flowers at home lack a recurring delivery subscription with flexible frequency options.

No Customization Options

Existing solutions offer no ability to choose box size, flower type, vase, or add-on special occasion bundles in one place.

02 | Our Solution

Key Features

Build-Your-Box

Choose box size (Small / Medium / Large), flower type, and vase. Full customization in one flow.

Flexible Subscriptions

Weekly, Bi-Weekly, or Monthly delivery. Pay-per-delivery or save 17% with yearly prepay.

Special Add-ons

Birthday bundles, anniversary roses, holiday arrangements, and sympathy bouquets on demand.

Seamless UX

Live order summary with dynamic pricing, real-time updates, and an elegant mobile-friendly interface.

03 | Working — Method & Mind Map

Home Page
(boxes.html)

Confirmation

Technology Stack

HTML5

Structure & Semantic Markup

CSS3

Responsive Styling + Animations

JavaScript

Dynamic Pricing & Form Logic

LocalStorage

Cross-page State (Order Data)

04 | Conclusion

Bloom Box successfully solves the gap in the online flower subscription market by providing a fully customizable, end-to-end e-commerce experience with real-time pricing and a seamless UX.

Goal Achieved

Built a full subscription flow from box selection to checkout with dynamic pricing across multiple pages.

Business Value

Flexible payment plans (pay-per-delivery vs. yearly prepay at 17% discount) cater to both casual and committed buyers.

Future Scope

Integration with payment gateway, backend API, delivery tracking, and a mobile app to expand the platform.
